New Partnership Created to Help Healthcare Companies and Tampa Grow

Advance Healthcare Partners and LCG Capital Join Forces in Downtown Tampa to increase profitability for healthcare companies

November 9, 2011 (TAMPA, FL) – Healthcare companies and medical facilities can now receive the expertise and funding needed to help them grow, all from one location in downtown Tampa.

AHP is a new cutting-edge healthcare consulting company that focuses on increasing revenues and is looking to disrupt and change the business of healthcare by offering business growth solutions that allow the physicians and researchers in the medical field to concentrate on what they do best, which is to serve patients and develop innovative new ideas in medicine. With the traditional medical approach sometimes hindering collaboration, AHP also creates access for partners to learn and collaborate with each other in order to help bring medical innovations to market at speed, while maintaining the highest level of patient safety and efficacy of the product or service.

AHP and LCG Capital, a Tampa-based investment bank that provides a broad range of financial advisory services, are aligning forces in Tampa's Fifth Third Center, 201 E. Kennedy Blvd. Both companies will maintain their own names, structures, and separate systems and will collaborate on research, consulting, and capital raising in the medical field.

"We have a genuine passion and belief in the systems and practices of our highly-beneficial business strategies that we instill and deliver to our healthcare partners' businesses" said Jimmy St. Louis, Advance Healthcare Partner's chief executive officer. "Partnering with such a well-respected firm like LCG Capital opens up even more ways to serve our clients to launch and excel their vision."

"The opportunity to partner with an exciting company like Advanced Healthcare Partners was one we couldn't pass up," said Brian Smith, managing partner for LCG Capital. "AHP's successful track record within the healthcare industry and their unique value proposition will truly benefit our clients in the healthcare industry."

Growth in the healthcare sector also means opportunity to help Tampa Bay grow. Opportunities to generate economic impact, recruitment from local universities, and community involvement are high priorities with both the AHP and LCG executive teams.
